PROFILE

- Around 3 years of experience in building responsive web application, tackling challenging architectural and scalability problems solving.
- Experience in developing application using HTML 5, CSS 3, JavaScript, Typescript, Angular 14 , SASS technologies.
- Experience in developing UI and its Components using Bootstrap 4 and Angular Materials.
- Strong skills in tools Visual Studio Code and GitHub.
- Exceptional communication skills, business insights to comprehend and convey technical issues. Proven ability to collaborate, lead and work incessantly towards organizations growth.

PROFESSIONAL EXPERIENCE

Software Developer

Applet Technology Services India Pvt - Ltd.

12 JULY 2023

NASHIK,

MAHARASHTRA

- Created reusable and modular components in Angular to promote code reusability and maintainability.Followed the best practices for component architecture, data binding and component communication.
- Implemented routing and navigation within the application to enable efficient navigation between different sections of the Application.
- Created Login and Signup Components using Reactive Form and Template driven Form.
- Integrated application with backend APIs and services to enable data retrieval and submission.Used HTTP libraries and techniques like RESTful API consumption to handle data exchange.
- Overcame data integration challenges in the User Module by implementing a custom API, ensuring accurate and up-to-date information for users.
- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements
- Coordinate with a team of UX and UI designers and backend developers to build quality web-applications with cross browser compatibility.

PROJECTS

E-commerce Application

- The project is an advanced e-commerce application meticulously crafted using Angular 14, specializing in the distribution and sales of sophisticated electrical accessories such as transformers, solar panels, motors, and batteries. It is designed to cater to customers looking for electrical equipment tailored to their specific needs, offering various options in terms of voltage,size,durability and other specifications The application is architecturally segmented into three distinct modules: Admin, Seller, and User, each tailored to optimize the platform's functionality and user experience.
- Led the front-end development of the user module using Angular 14, ensuring a seamless and user-friendly experience
- Implemented lazy loading to improve application performance and load times.

- Utilized Angular Material components for consistent and attractive UI designs.
- Leveraged RxJS and Observables to manage complex asynchronous operations and data flow management.
- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements. Participated in code reviews to maintain code quality and promote knowledge sharing within the development team.
- Created custom services. Components and directives for reusability and optimization of the application.
- Worked with modules, pipes, routing, interceptor and Observables.
- Utilized different typescript features such as Interfaces, Decorators and Classes.

SKILLS

- Angular 14, Angular Material, Typescript, JavaScript, AJAX, JSON, FLEX, SASS, RxJS, Bootstrap4, CSS3, HTML5, GitHub, Visual Studio Code, Angular-CLI, Jira, unit testing, micro Frontend,

EDUCATION

BSC.SE (Bachelor of Software Engineer)

Swami Ramanand Teerth Marathwada University, Nanded
